Amendment, filed 12/02/08, has been entered. Claims 18, 21, 22, 24-30, 32, 34-40, 42 and 44-46 remain pending.

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 18, 30, 40 and 44 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 6, 10 and 14 of U.S. Patent No. 6,657,969. Although the conflicting claims are not identical, they are not patentably distinct from each other because means/steps directed to requesting a format of in-transit data of the current Application claims, for example claim 18, are essential for generating format information, as claimed in claim 6 of the patent, and inserting and dropping date at nodes of the current Application claim 18, are essential for re-directing traffic, as claimed in claim 6 of the patent.

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 18, 21, 22, 24-30, 32, 34-40, 42 and 44-46 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 18, 30, 40 and 44 limitations, directed to steps/means of generating and requesting a format of in-transit data transmitted over the network links, are unclear.

For example, claim 18 limitations list the mentioned steps with no correlation to each other and in wrong sequence, contradicting Summary of the Invention on pages 5 and 6 of the disclosure.

The Summary highlights the importance of determining of the STS type of the network links (in-transit data format) at each node in advance, to keep this data in each node for protection switching operation, making the requesting step as a precondition for the generating step.

Other claims are rejected as the claims depending on the claims rejected above.

***Response to Arguments***

3. Applicant's arguments with respect to claims 18, 21, 22, 24-30, 32, 34-40, 42 and 44-46 have been considered but are moot in view of the new ground(s) of rejection.
